- The service matrices illustrating services and corresponding expenditures from the Family and Children's Account were presented and discussed. The service document was compared for similarities between counties. The group found many similarities that exist between the counties of this region and found that there was a strong basis from which make regional plans.
- There was a discussion of potential members for the team. It was decided that identified members would be contacted by team members to determine interest.
- Next meeting would be scheduled at a later time following contact by Char with Judges.
